nothing would give them more pain. Sankey farewell meeting last night 188 of the clergy

Sankoy farewell meeting last night 188 of the clergy of the Church of England were present, far outnumbering those of any other denomination. Canon Conway of Westminutor occupied a seat on the platform. All present were deeply affected. Moody, while speaking, was so overcome by smotion that he had to stop and was unable to conclude his address.

Lexpox, July 18th—A meeting was held at Hyde Park to-day to protestagainst the grant for the Prince of Wales' visit to India. Twelve thousand persons were present. Mr. Bradlaggh made a violent speech, and offered a resolution of a signifiar character, which was adopted almost unanimously. Eight persons who voted against it were set upon by the crowd, and the police had to inherfere.

cice has to interfere. Emperor William of Germany, will make that long specied visit to Victor Emannel, at Rome, in Sep Lounon, July 18th.—Lady Franklin, wife of \$47 John Franklin, died last night.

AN INDEPENDENT JOURNAL, DEVOTED TO HAWAIIAN PROGRESS.

PUBLISHED AND EDITED BY HENRY M. WHITNEY.

WEDNESDAY, AUGUST 4. HIS MAJESTY visited H. B. M's ships Challenger and Peterel, at 12 M. yesterday, and companied by His Ministers and Staff officers.

THE complication into which our divorce laws have been thrown by careless enactments during the past four or five years, has been terminated by a decision of the B. M.'s ship Peterel; Lieut. A. Carpenter, H. B. M.' full bench of the Supreme Court, declaring ship Chellesper; J. Labouverie Page, Paymaster H. | the recent enactments unconstitutional, which restores the divorce laws that were repealed by them. It cannot be denied that part of the legislation during the past few years has been of the same character,-unconstitu tional. But what else can be expected from such ignorant representatives as are some who Green, Minister of Foreign Affairs; His Ex. W. L. have had seats in the Assembly during this po-Moshonua, Minister of Interior; His Ex. J. S. Wal- riod? If we are to have sound laws, we must have discreet and intelligent law-makers; and Attorney General; His Ex. John 6. Dominis, Gov- it is extremely doubtful whether we can have them until our present system of paying \$250 per session is abolished, and men are chosen who are willing to fill the position for the honor of being members of parliament. The sooner the change is made, the better for the honor of the nation and the treasury.

THE terrible calamity which occurred in France early last month, and which is elsewhere recorded, has not been equaled for many years. Two thousand people killed or drowned, one hundred thousand more rendered homeless and penniless, and millions of property de- Had the jury stood nine against and three for dis stroyed, is the substance of the reports from the scene of disaster. As to the cause of this calamity, an English paper says: About ten years ago the Imperial Ministry permitted several hundreds of millions of trees to be cut in the forests which flanked the Garonne and the Tarn, and the result of this extraordinary inundation has been to destroy the steady supply of water. The mountain snows being no longer protected from the sun, melted rapidly, and, as we learn, swept down into the vallies, bearing death and destruction far and wide. Moral-

THE death of Lady Franklin, which occurred in London July 17, will cause many to recall her visit here in 1860. She and her neice Miss Cracroft, spent several weeks on these islands, and during their stay were the guests of Mr. Wyllie. There never was a more noble-hearted or devoted woman than she; and to the end of life she still clung to the hope of hearing from her long-lost husband. Her last act was to share in the expesse of fitting out a vessel to accompany the British Arctic Expedition, July 27th-W. H. Stone vs. W. F. Allen-Plea to which left England May 29. This vessel sailed under command of Captain Young, who was with McClintock, and was despatched to search for and recover whatever may yet exist in that desolate land where Sir John perished, that belonged to him or his companions. The expedition is at the expense of Lady Franklin, Captain Young and James Gordon Bennett. It may recover some record of the lost crews, but the general belief is that no one will ever return to tell the tale of fearful suffering and death of Sir John Franklin and his bold companions, beside whose names, that of the he-Justice Harris delivered the opinion of the Court, role and hopeful Lady Franklin deserves to be

The Pacific Mail Contract.

We have nothing later from San Francisc regarding the contract to continue the Australian mail service than what we gave last week. In the United States it was generally supposed that the contract made in London would be ratified by the colonial parliaments; L. Marchant vs. H. F. Marchant-Case beard and but this had not taken place up to the latest advices, or at least no announcement of it had been made. It was proposed to despatch the first boat of the new line from San Francisco on October 11, so as to have her in her place, to start promptly November 20th, from Sydney or Otago. It is stated that Mr. H. H. Hall will be employed in some capacity as traveling agent of the company, and will accompany the

A statement has been published, giving the particulars of the various contracts and subsi-The new city directory of Rochester contains 80,013 dies received by this company, and including names. The assessed valuation of the real and pernearly \$1,100,000 per annum. Among the new contracts, is one for carrying the mails between San Francisco and Victoria, V. I., which commenced July 15, the Vasco de Gama being the first boat despatched on that route, An article in the Bulletin states that "under the new organization of the Pacific Mail Company, increased energy has been infused into the management of affairs, and announcements of increased facilities and the extension of its sphere of enterprise follow in succession. As heretofore published, the Company has been awarded the British mail contract between 7-292; Eighth, Brown, 17:332; Ninth, Waltham, New Zealand and Australia and San Francisco. and will inaugurate the new line in October by dispatching the pioneer steamer hence. ter will be employed in this service, and will

The American people, who assembled at Boston June 17th to the number of nearly half a million, to celebrate the centennial anniversary of the Battle of Bunker Hill, appear to Lespon, July 12th.-Moody and Sankey's farewell have had a most enthusiastic time of it, full took placete-night. The Barl of Shaftesbury, Samuel reports of which appear in the Boston papers of about that date. One noteworthy feature was the appearance of so many southern troops and confederate soldiers and political leaders. From all accounts, it would seem to have been their converts. A suggestion was made that a me. the inaugaration of a new era of good feeling morial of some kind be presented to them. Mr. Stone between sections of the United States which on their behalf, said it would not be accepted and that for several years have been alienated. One of the best comments on the celebration of June Lounger, July 15th-5:30 A. M.—At the Moody and 17th, appears in the London Times, and its spirit is in marked contrast with that of some

other articles in the London journals: "Not only the Americans, but England, and the world, have far more substantial reasons for a grateful remembrance of the day. The greater part of the American contention in that war was equally shared by the British people. The principles of popular representation, and no taxation without it, self government by popular municipal institutions, the independence of the judicial bench, and complete responsibility in the exercise of all power and patronage, were equally at stake on both sides | forward is sufficient to show that the state- | These indices are set with a magnet.

nacy with which the British Government persisted in the struggle, long after every man at cians then at the head of affairs, and the peowas received with manned yards. He was ac- Chatham and Burke, and, as they well knew, against the true people of England, Meanwhile they had to do all the work, whether for a significant fact that one of the witnesses and in the balance, and himself lived to suffer the disastrous reverse which, two years after, left no doubt how that balance would finally rest. Fortunate was it for England that the question was fought so far from its shores. The triumph of American Independence inaugarated a great but bloodless work at home in the shape of popular reforms, or, rather, in the fuller derelopment of those Democratic institutions by which it has been said the British throne is surrounded. Whatever the Americans have gained we have gained also, and now possess substantially all that they fought for.'

Opinions differ materially as to the effect of the disagreement of the jury upon the position of Beecher. It is true that this outcome neither clears nor convicts him, but it may be urged that when nine men out of twelve concluded that he was innocent, the decision will be regarded, and rightly, as entitled to respect. him, his position would have been very different; in fact, we do not see how, under such circumstances, he could have continued to preach. As it is, his vindication has not been had, but neither has his conviction, while the actual facts are so far in his favor that threefourths of the jury were ready to declare him the victim of a conspiracy. It is not a full settlement of the charges, but it is perhaps as satisfactory a settlement as could have been expected. We do not see why it should interfere with the career of the preacher. If he could justify to himself his continuance in the pulpit while the trial was proceeding, there is no reason why he should withdraw now that the case is (at least for the time) ended. But there is ground for the expectation that a much fuller vindication may be in store for the pastor of Plymouth Church.

The Loeder and Price conspiracy threatens to involve Tilton, Moulton, and Tilton's attorneys in a most disgraceful and odious piece of villainy, and if the facts should prove as reported we do not perceive how Tilton can expect to escape the penitentiary. It is impossible to avoid the conclusion that he procured the perjury of these men, and that he did it for the deliberate purpose of blackening the reputation of his own wife, whom he had previously failed to crush by the original charges. It appears to us that a man who is scoundrel enough to perpetrate so ineffably infamous a deed as this is not fit to live, and ought to be taken out and hanged incontinently. What the testimony of such a wretch should be allowed to weigh, against the character of a man like Henry Ward Beecher, is also an interesting the dradging line passes. consideration. It is, however, apparent that the case is not ended, and if, as now seems possible, it should conclude by the conviction the effect will be quite as great as though the jury had rendered a verdict for the defendant

without leaving the box. We confess that as the part played by Tilton and Moulton in this villainous plot begins to come out more clearly, we find it extremely difficult to accord their testimony on other matters the least possible authority, and can scarcely regard their attack upon Beecher as. serious thing. As the case now stands, however, it is not possible to conjecture what the ultimate effect will be upon Beecher's fame and usefulness, simply because the new developments tend to cast doubt over everything that has gone before. If Loeder and Price are convicted, and the complicity is fastened upon Tilton and Moulton, we believe the public judgment will be to the effect that Beecher has been the victim of a foul conspiracy, and that he is an innocent man. In any other event it will become necessary to consider what attitude the great preacher is henceforth to occupy .- Sac. Union.

The Great Brooklyn Conspiracy.

The closing act of the Beecher-Tilton trial guilty of such infamy he will go to the Penitentiary beyond a doubt.

Tilton and counsel to make his testimony clear | sis, &c. and probable. A diagram of Tilton's house was drawn for him, with instructions to study tions of doors and pictures were also explained out of town in charge of a keeper and was kept part of the tube, which moves up or down as drunk much of the time. They fought for dear life against or his friends or counsel knew what the real character of this testimony was. As regards Tilton we are not at all surprised, for we think him dishonest enough to perpetrate any vilpeace or for war by second-rate men. It is lainy; but in the case of his counsel it is less easy to suppose them cognizant of the fraud. chief actors in the scene at Bunker's Hill, left | As a matter of course only a very powerful on record his opinion at the time that the motive could have induced any one to encounsused the course usually followed by the transmotive could have induced any one to encounter the heavy risks inseparable from the concoction of such a conspiracy. That powerful motive Theodore Tilton possessed, but his British Empire in America was then trembling ter the heavy risks inseparable from the concounsel did not. It was everything to him to sage, secure a verdict. It was quite a secondary in matter to them. Under the circumstances, therefore, he must be the most strongly suspected, and the probability is that the fraud will eventually be brought home to him. It is scarcely necessary to point out that if he is convicted of so infamous a crime it will be impossible longer to doubt that his case is trumped up, since it would be contrary to all reason to hold that a man capable of such 'ncredible baseness should be entitled to credence in cognate matters, while it would be equally opposed to reason to conclude that a man whose cause was just would descend to such villainy for the purpose of fortifying it. If, therefore, Beecher's counsel are wise they will bend every energy to the unravelment of the conspiracy, and will attach little importance to the verdict of the jury so that they succeed in fixing the responsibility for the most atrocious piece of scoundrelism that has come to light for half a century.

The Voyage of the Challenger.

H. B. M.'s ship Challenger, engaged on a scientific voyage around the world, arrived at this port on Tuesday, July 27, from Yokohama, Japan. Leaving Portsmouth, England, on the 21st of December, 1872, this vessel, first under the command of Captain Nares and now under that of Captain Thomson, has been engaged in the great work of sounding the ocean depths, and exploring its mysteries. She has been a wonderful traveler since leaving England thirty-one months ago, having in that time visited some forty-two ports in Europe, Africa, Australia, the East Indies, China and Japan, and sailed 46,674 miles. The amount of scientific observation and investigation accomplished by her officers and scientific staff (at the head of the latter is Professor C. Wyville Thomson) must be something prodigious.

The instruments for sounding, dredging, and for ascertaining the temperature, are all of the latest invention, and are curiously suggestive. We are indebted to a gentlemon on board the Challenger for a description of some of these, premising that a sounding wire is used six niles in length.

The accumulator-consists of about 40 or 50 india rubber bands, 34 inch in diameter, and three feet in length. They are capable of stretching seventeen feet, when they each exert a pressure of seventy pounds. At the bottom of the accumulators are two discs of wood, through holes in which each of the bands pass and are attached to a block, through which

The sounding rod-is an improvement on the first supplied on leaving England by Lieuthe first supplied on leaving England by Lieu-tenant Bailey, R. N. It is a cylinder of iron SOMETHING of Tilton and Moulton of subornation of perjury, tubing, three inches in diameter, and about n regard to the Loeder and Price affidavits, four feet long, having at its bottom a butterfly valve. On the upper part is a mechanical contrivance for letting go the weight on the rod touching the bottom. The weights are 112 pounds each of cylindrical form, with a hole through the centre. Through this hole the rod is passed, and as many weights put on as found necessary, one for every 1,000 fathoms. At the bottom of the last weight a small iron ring is reved on the rod, to which is attached a piece of iron wire, about ten feet long. The bight of this wire is passed over a "ketch," and the rod being lifted the weights rest on the iron ring. By their reaching and resting on the bottom, the wire is forced off the ketch, and the rod being hauled up by the line clears itself from the weights, which remain at the bottom.

The slip water bottle, for bringing up water from the bottom, consists of a brass rod, with three radiating plates to strengthen it and to act as a guide for a brass cylinder which en closes the water. At the bottom and half way down the radiating plates, are two finely ground sections of cones, and the brass cylinder is so arranged that its upper and lower surfaces fit with great accuracy on these cones, has increased the general interest in it. We thus enclosing anything that may happen to refer to the testimony volunteered by Loeder | be between them. At the top of the rod is a and Price. Loeder's story, which was very brass tumbler with a slit in it; to the tumbler strong indeed, and went to fix the crime of is attached a lanyard to fasten the bottle to the adultery on Beecher, is now admitted to have head-line, and over the slit is placed the bight been fabricated, through and by the suggestion of a line the ends of which are secured to the and assistance of Tilton and some of his coun- cylinder, by means of which the cylinder is sel. SUPPLIES COURT OF THE HAWAHAN ISLANDS IN Probate, Order of Notice of Patition for Administration, Before Mr. Timetoe, Harris, In the United of THOMAS JOSES, of Household, Island of Court

DR. J. COLLIS BROWNE'S CHLORODYNE IS THE ORIGINAL-AND ONLY GENUINE.

THE PUBLIC ARE CAUTIONED AGAINST THE PUBLIC ARE CAUTIONED AGAINST the enfounded statements frequently made, "that the composition of Catamonran is known to Chamists and the Medical profession." The fast is, Chloredyne was discovered and invented by Dr. J. COLLIS BROWNE (or Army Medical Staff), and so named by him, and it has baffled all attempts at analysis by the first Chemists of the day. The method and secret of the proparation have never been published. It is obvious, therefore, that snything sold under the name, save Dr. J. COLLIS BROWNE'S CHLOROBYNE, is a sportous finitation.

CAUTION.—Vice-Chamcallor Sir W. P. Wood stated that Dr. Collis Browne was undoubtedly the inventor of Chlorodyne.

of Chiorodyne.
REMEDIAL USES AND ACTION. REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleer relieves pairs, catum the system, restores the chranged fastions, and stimulates healthy action of the corretions of the ody without erediced any of those unpissesses results a feating the use of opinin. Old and young may take it at a hours and times when requisite. Theseanche of persons is trip to its marvellions good effects and windingful array, whi medical men axio its virtues most extansively, using it, great quantities in the following dissesser.—Choises, Dystery, Diarrhees, Colleg. Coughs, Asthus, Rhemmatian, Meralgia, Whosping Cough, Gramp Hysteris, &c.

EXTRACTS PROM MEDICAL OPINIONS. EXTRACTS FROM MEDICAL OFINIOUS.

The Right Hon. Earl Russell communicated to the Coll Physicians, and J. T. Davenpoer, that he had received transition to the effect that the over russely stany service holorowas CHLORODYNE.—See Lenect Dec. 31, 1884, Dr. Lowe, Medical Hasimury in Ledin, reports (Sec. 2) hat in nearly swery case of Cholera in which Dr. J. Coll. Extract from Medical Piece, Jan 12, 1866. - "Chlorodyna is

receitified by scores of orthodox medical presidence. Of course it would not thus be sliggularly popular did it not supply a went and fill a place. "

Retract from the General Board of Health, London, as to its officacy in Cholora.—" Scattengly are we convinced of the mineus value of this remedy, that we cannot use facelity args the necessity of adopting it in all cases."

CAUTION.—None genuine without the words "Dr. J. COLLIS BROWNE" on the General manner. Stump, Overwhelming medical testiments accompanies such bottle. g modical testimony accompa Solo Manufacturer J. T. DAVENPORT,
